

## **CE Circular No. 111**

### **Inspection of unmanned level crossings by P-way officials**

No specific schedule of inspections for unmanned level crossings is prescribed in IRPWM. Due to increased vehicular activities in rural areas, incidences of accidents at unmanned level crossings are on rise. Therefore, there is a need for regular intensive inspections at unmanned level crossings. The practice being followed on the divisions is not uniform. Henceforth, following schedule of inspections for unmanned level crossings is to be followed by various P-way officials.

- i. Schedule of inspections
  - a. Sectional JE/SE/P-way to inspect all unmanned LCs once in 3months.
  - b. SSE/SE/P-way to inspect all unmanned LCs once in 6 months.
  - c. AEN to inspect all unmanned LCs once a year.
  
- ii. Unmanned LCs should be inspected and record maintained in register for 'Inspection of unmanned level crossings' as per enclosed performa.

DA: As above.
