

## **CE Circular No. 114**

### **Different speed restrictions for passenger and goods stock at same location**

Chapter VIII of IRPWM deals with the provision of speed indicators for permanent and temporary speed restrictions. But there are certain locations where restricted speed for passenger and goods trains is different. For such locations, a speed indicator board showing clearly the restricted speed for both kind of trains should be placed at 30 m before the location.

A type plan of speed restriction board for multi speed restrictions is enclosed for use at all such locations.

DA: Copy of Plan
